July 24, 2018

The following inquiry was made on 7/23/18 regarding:

Epoxy Overlay and Concrete Surface Coating

Inquiry: Per the progress clause in this project's special provisions, the Start date is September 4th, 2018 and the Open to Traffic & Final Completion date is on or before October 20th, 2018. Does this date include the application of the epoxy overlay and concrete surface sealer? We do not believe this allows enough time to obtain full cure on the new concrete prior to applying treatments. Would it be possible to take a week late next spring to complete this work? Please advise.

Response: It is MCDR's intent to have all items of work completed by the final completion date of October 20, 2018. Should the late season weather conditions not allow for proper application of the Epoxy Overlay and/or the Concrete Surface Coating, an extension of time to complete those cure-dependent items when weather permits in spring of 2019, will be granted.
